

I feel the FCC should not do anything to the proposal that will diminish the shield of protection that the Indiana's Telephone Privacy provides.

Indiana's Telephone Privacy law has improved my quality of life at home.

Indiana's law has been able to reduce my total amount of call's I've received to none.

There are many ways to solicit calls, and having a computer to just start picking random phone numbers and call is invading on everyone's privacy.

Thanks,

Gary Weliver
